

## CHEMOMETRICS: MULTIVARIATE ANALYSIS

(30 hours – 5 CFU)

(Prof. Riccardo Leardi – Univ. Genova)

This is to inform you that the course “Chemometrics: Multivariate Analysis” taught by Prof. Riccardo Leardi (Univ. of Genova) will be held on November 18<sup>th</sup>-21<sup>th</sup>, 2019. This course is 30 hours in total (5 CFU). At the bottom, you can find the final schedule. Remember that you have to attend at least 75 % of the course.

The course of “Chemometrics” is mandatory and consists of two parts (Multivariate Analysis and Experimental Design), each part is taught every other year. The second-year students (XXXIV series), who have attended the Experimental Design module last year, will attend the Multivariate Analysis module this year. The first-year students (XXXV series) will attend the Multivariate Analysis module this year and the Experimental Design module next year.

During the course, Prof. Leardi will use a free software developed by the Gruppo Italiano di Chemiometria. Please make sure to have downloaded and installed it on your PC <http://gruppochemiometria.it/index.php/software> before the beginning of the course.

In you need any further info, please contact us [dottorato.geoscienze@unipd.it](mailto:dottorato.geoscienze@unipd.it).
